Re: Permit #DE 0000299  
Discharge 001

Dear Mr. Davis:

This letter is to follow up the 24 hour verbal notification to you that occurred on January 13, 2011 concerning the Total Suspended Solids composite sample for the sampling date December, 2010. Per the notification requirements of Part II Section A.2(b) of the referenced permit we report the following:

**Allen's – Harbeson 001 Composite Sample**

Sample Date	Parameter	Results Reported
December, 2010	Total Suspended Solids	154.6 lbs/day

As we discussed the Allen's Harbeson wastewater treatment facility had experienced a blown air header in the CMAS 2 tank. It was necessary to take the CMAS 2 tank out of service for a week while repairs were made. The sample taken on December 29<sup>th</sup> while CMAS 2 was out of service had a TSS value of 22.1 mg/L even though it remained in compliance. The value resulted in the monthly average of 154.6 lbs/day. The tank was put back in service on January 1, 2011. The TSS value for the sample date January 4, 2011 was 3.2 mg/L with exceptional effluent water quality being discharged.

If you should have any questions, please do not hesitate to contact me at (302) 684-1640, Ext. 184.

Respectfully Submitted,  
ALLEN FAMILY FOODS, INC.

A handwritten signature in black ink, appearing to read "Michael R. Sausé". The signature is fluid and cursive, with the first name "Michael" being the most prominent part.
